Wisconsin Schools Need our Help!

As a result of Wisconsin's flawed school funding system, the amount of money going to our schools has not matched the rising cost of quality education.

Therefore, communities around the state have been forced to lay off staff, increase class sizes, cut programs and services, and increase their reliance on already overburdened property taxpayers. This crisis situation was made even worse when the state government decided to cut aid to public schools.

Now it is our turn to step forward. A "Penny for Kids" is all it will take to provide for our children and maintain the high quality of life that our communities deserve.

Sign the "Penny for Kids" petition to tell Wisconsin legislators that our schools need their attention now and a penny-for-kids sales tax increase is a good way to start
